Subject: FW: Strategic review question - JTI

Ladies,

This is for your information. Take a look at the explanation. Martine this affect you mostly as you are the one who work on it. I have not forwarded the attachment as it is not our data and we don't need it anyway. Let me know if you have question. Martine when you have a minute at one point try to explain Cavell what this is related to as it is "good to know" stuff.

Good morning Janine,

We have been collecting the JTI stats since FY06/07, by compiling the data from the daily reports sent to NRAC by the two targeters in the US. This is in the attached e-mail. In Program Services we have so far not collected information concerning resultant exams or other positive results in these reports, but this will be forwarded to you separately from our Enforcement Operations section.

Please do not hesitate to contact me if there are questions on these reports.

Regards,

Francine Barrette

Janine,

With the exception of examination results, we have the requested information readily available. We will gather the information (including examination results) and provide a response to your office by end of day tomorrow.

Please advise if this is satisfactory.

Importance: High

Hello Ken,

The Joint In-Transit Targeting Initiative (JTI) is one of the activities that falls within the Screening Abroad – Commercial Program definition. Enforcement Programs Directorate has been very helpful in supplying information about the initiative as a whole, but I would appreciate any assistance you can provide in supplying statistics relating to program performance. If possible, I would appreciate (for each of the past five years):

- Number of container manifests reviewed by CBSA JTI targeters;
- Number of containers referred for examination;
- Number of JTI-referred containers that were actually examined; and
- Number of examinations that were resultant (and for what – contraband, weapons, etc).

If there is a dollar value associated to the intercepted goods, this information would be useful as well.

I am not sure if it will be easy for you to obtain this information or not, so would you mind letting me know if I will be able to obtain this information and, if so, when it might be available?

Thanks in advance for your assistance.

I spoke to Shane in CMRS. The attached spreadsheet is what was referred for foreign exam by NRAC. These numbers don't include the transborder or in-transit from US. As you can see, there was one in 2005-2006 that is still awaiting examination results... so it means that NRAC never entered the results and closed the case. What we can know is what NRAC referred for foreign exam and if the exam was resultant or not (if they enter it in TITAN of course...). We can not know it was resultant for what. We can only know what was generated from NRAC not from JTI. These are not JTI activities like asked below but NRAC... Does NRAC always enter those referrals in TITAN.... I don't know. Are those numbers accurate, I don't know? I'm sure that NRAC have more accurate numbers from their own tracking then what CMRS can give us. I tried to call a contact I had in NRAC but no answer.

However, if this is important to capture in the future, the JTI should make arrangements in TITAN to add a field to capture that it is their referral and then we could capitalize on this in the future and acknowledge.

I do not see any option to retrieve this type of information presently.

Where do JTI targeters signify that the examination or referral relates to JTI? Is this from a TITAN identifier screen? If so, perhaps we can find it in the future, but currently I do not believe we separate this feature. If there is some place where it is identified, then perhaps we can get an Ad Hoc report.

Thanks,

Bonjour Shane,

I am now part of the Operational Reporting team in Operations Branch and we got a request to collect the stats below for the last five past years. I know we can find the number of containers referred for examinations and the examinations that were resultant, but can we know for what (contraband, etc.) and what about containers reviewed by JTI targeters?

I need this info ASAP, thank you very much.

The Joint In-Transit Targeting Initiative (JTI) is one of the activities that falls within the Screening Abroad – Commercial Program definition.

- Number of container manifests reviewed by CBSA JTI targeters;
- Number of containers referred for examination;
- Number of JTI-referred containers that were actually examined; and
- Number of examinations that were resultant (and for what – contraband, weapons, etc).

If there is a dollar value associated to the intercepted goods, this information would be useful as well.
